

PETROLEUM LOGISTICS

Fuel solutions | Aviation fuel | Lubricants | Fuel cards

Volume 1, Issue 1

July-2008

Petroleum Logistics are the NZ agent and stockist of the world renowned aviation range of the Phillips 66 branded Lubricants.

New Warehouse

Petroleum Logistics has opened a new warehouse situated in Tauranga on the Tauranga airport. The warehouse will be used for the distribution of the Shell Aviation products plus the Phillips 66 products. The warehouse will also be home for the new offices.

Also coming soon will be a Jet A1 airport refuelling unit to be based on the Tauranga airfield to help cover the existing/new customers needs .

Warehouse:

23 Kittyhawk Way
Tauranga Airport
Tauranga

Directors Report

PLL is continuing to invest and grow the New Zealand General Aviation and overseas markets. Just recently we have added a full range of Aviation Lubricants from Aeroshell, Phillips 66 and Mobil Jet Oils. Steve Browne our logistics manager heads our warehouse and is responsible for all products reaching our customers along with implementing and maintaining our requirements within the Aviation industry like PLL's CAA Certificate to operate... Bryan McRae leads our transport fleet and is growing our services, deliveries and also has responsibilities taking care of our "bulk storage" facilities of Jet A1, Avgas, Petrol and diesel.

PLL is currently working on many new projects to further invest and enhance the General Aviation Market within NZ, this includes new above ground 24/7 sites along with Technical services. This will see more employment for PLL. Shell Aviation our partners have been most helpful in moving PLL forward. We will continue to form new relationships with key suppliers as the petroleum industry is forever changing.

We look forward to the next 12 months - it's going to be interesting times for sure! Our focus is 100% on our customers

Regards

Rob Bolton – Managing Director

NEW ADDITION

PLL, new addition to the fleet.

Just arrived and into the work straight away the Petroleum Logistics 2000 Freightliner Argosy and three axle full trailer are a big addition to the ever growing fleet of refuelling and bulk delivery units that Petroleum Logistics have in the field. This new unit in the fleet happily named "Air force One" is capable of delivering 36,500 litres of Jet A1 to fill the customers needs.
